

NEEL BHATT

Full-Stack Software Engineer & AI / ML Developer

Vadodara, Gujarat, India • bhattneel2004@gmail.com • +91-9265982724 • github.com/neel20409 • [Portfolio](#) • [LinkedIn](#)

SUMMARY

Versatile **Full-Stack Software Engineer & Data Science Practitioner** with hands-on experience architecting production-grade web applications, multi-tenant SaaS ecosystems, and scalable machine learning pipelines. Proficient in **Next.js 15, NestJS, TypeScript, PostgreSQL, React Native (Expo), Python, and Scikit-Learn**. Proven record of building high-performance APIs, integrating generative AI voice workflows, and engineering 20+ end-to-end data science and full-stack projects.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL (PostgreSQL), Kotlin, HTML5/CSS3
- **Frontend & Mobile:** Next.js 15 (App Router), React 19, React Native (Expo), TailwindCSS, Three.js, WebGL, Framer Motion
- **Backend & Databases:** NestJS, Node.js, PostgreSQL (Prisma/TypeORM), Redis, Supabase, Socket.io, MongoDB, REST APIs
- **Data Science & ML:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, ydata-profiling, Feature Engineering, EDA, Cross-Validation, ROC-AUC
- **Cloud, AI & Tools:** Google Gemini API (Multilingual Audio/Vision), Docker, Railway, VPS, Git/GitHub, Linux, Postman, VS Code

PROFESSIONAL EXPERIENCE

Software Development Intern — [Clever Minds](#)

Mar 2026 – Apr 2026

Vadodara, Gujarat

- Architected and delivered a production-ready **Wholesale Admin Mobile Application (22+ screens)** using **Expo React Native, TypeScript, and Supabase** for a live enterprise client.
- Integrated **Google Gemini Native Audio API** to enable AI voice-driven order and inventory operations supporting **Hindi, Gujarati, and English** with fuzzy-matching string algorithms.
- Implemented offline data persistence, role-based access control (RBAC), real-time stock notifications, and authored complete architectural documentation.

KEY PROJECTS & SAAS PLATFORMS

OBIX 360 — Multi-Tenant Enterprise SaaS Platform / *Next.js 15, NestJS, PostgreSQL, Redis, Docker, TailwindCSS* **Live Production**

- Engineered a scalable multi-tenant business suite featuring automated WhatsApp communication channels (Baileys), order pipelines, and dynamic analytics dashboards.
- Optimized PostgreSQL database schemas and indexing to achieve sub-50ms response times for high-volume transactions; containerized microservices with Docker for seamless deployment.

SyncWatch — Real-Time Synchronized Video Streaming / *Next.js, Socket.io, Node.js, MongoDB, Railway* github.com/neel20409

- Built a low-latency collaborative watch-party platform with real-time room chat and millisecond-accurate video state synchronization across distributed clients using Socket.io and YouTube IFrame API.

Data Science & Predictive ML Pipeline (22+ Projects) / *Python, Scikit-learn, Pandas, NumPy*, github.com/neel20409/DataScience

Seaborn

- Constructed end-to-end classification pipelines (missing-value imputation, title extraction, categorical encoding, StandardScaler); benchmarked 5 models with 5-fold cross-validation, achieving **84% accuracy** with Gradient Boosting.
- Performed extensive univariate and multivariate exploratory data analysis (EDA), generating automated profiling reports and evaluating models via ROC-AUC curves and confusion matrices.

EDUCATION

Bachelor of Computer Applications (BCA) — The Maharaja Sayajirao University of Baroda, Vadodara

Graduating 2027

LANGUAGES

English (Professional Working Proficiency) • Hindi (Native) • Gujarati (Native)
