SUMMARY:

Full Stack Developer with a strong foundation in web and mobile platforms, currently specializing in AI/ML integration.

TECHNICAL SKILLS

Category	Key Technologies
Web & Mobile	React, Next.js, React Native, Kotlin, TypeScript
Backend & Data	Node.js, Python, MongoDB, PostgreSQL
AI/ML	TensorFlow, Generative AI (LLMs), NLP, Computer Vision
DevOps & Tools	Docker, Git, AWS, Vercel, Postman

PROJECTS

- Spotify Clone (Mobile Application)** :- A cross-platform music streaming app built with React Native, featuring background audio controls via react-native-track-player and global state management with Zustand.
- AI-Powered Chatbot Platform** :- A responsive Next.js web application integrating OpenAI/Gemini APIs for real-time, streaming AI interactions deployed via Vercel and GitHub Actions
- Sync Watch** :- Developed a real-time collaborative web application allowing users to watch YouTube videos in perfect synchronization. Implemented low-latency "pause, seek, and play" functionality and integrated a live chat system to enhance remote social interaction.
- Educational Resource Management System (SRS Project)**:- Authored a detailed Software Requirements Specification (SRS) for a resource management system, architecting system workflows and user-role modules as part of a Software Engineering course.

EDUCATION

- Bachelor of Computer Applications (BCA)** | *The Maharaja Sayajirao University of Baroda* | 3rd Year (Sem VI) | Focusing on Advanced Web Technologies, Mobile App Development, and AI/ML Integration.
